Dear ILC GDE and Physics/Detector collaborators

We are sending the 2nd announcement for the 1st Baseline Assessment Workshop (BAW-1) to be held at KEK, Sept. 7 -10, 2010.

The indico conference page for the BAW-1 is now available as follows:

<http://ilcagenda.linearcollider.org/internalPage.py?pageId=5&confId=4593>

Main Subjects:

1. Single tunnel ML design and High-Level RF system
2. ILC Accelerator field gradient with SCRF cavity

Objectives and goals:

- Assessment of technical proposal in SB2009
- R&D plan and goal in TDP-2
- Impact across system interfaces, cost and schedule, and
- Discussions toward consensus in GDE and Physics/Detector groups.

Timetable/schedule (still in progress):

- The current plan is given in the Indico URL information attached, and it will be updated according to any comments and advices.
- Your comments and advice will be appreciated.

Registration encouraged:

- The registration to participate in the workshop can be made through the indico 'Registration' page.

Accommodation:

- The information is available also in the indico page and we would encourage your own effort to reserve the accommodation according to the instruction available at 'Accommodation' page.
- The rooms to be blocked by Aug. 8, at Hotel Ohkura and Urban Hotel for the workshop for a period of Sept. 6 through Sept. 10 (the night).
- The reservation can be made on a 'first come - first served' basis, within limited numbers of rooms.

We are hoping your participation and contribution to the workshop to be successfully carried out.

With our best regards,

Akira Yamamoto for the ILC GDE Project Managers and
Seiya Yamaguchi for the BAW-1 Local Organizing Committee at KEK
